Solvent Photo Satin Paper

This satin photo paper has been designed to produce photo quality images and sharp detail on solvent and UV curable printers. The specially formulated coating will produce more accurate gradients, color transitions, and a more uniform color than un-coated vinyl. Use this media where a higher image quality, color depth, and close-up viewing is required. This photo paper is compatible with most solvent and UV curable inkjet printers. For best lamination results use a heat activated (200 degree) over laminating film.

Basis Weight:	179 gsm	Brightness:	95
Caliper:	6.9 mil	Whiteness:	120 (We)
Opacity:	95%	Gloss:	25 @ 60°

<i>Feature</i>	<i>Advantage</i>	<i>Benefit</i>
Accept high ink load	Increased image density	Higher color gamut, better printed image
Over laminate with a heat film	Easier, better results	Save money on lower cost films
Smooth blemish free surface	No image defects	More “usable” prints, satisfied customers
Satin Finish	Photo quality	Reduced glare, more realistic photo images

Optimal Storage Conditions: Temperature 59° - 86° F - Humidity 30% - 70% RH

Shelf Life: One year stored at above conditions, unopened in original packaging
