**Solvent Fast Dry Backlit Film**

This superior polyester based backlit film is designed to utilize a single strike profile and still provide more image density than films requiring a double strike profile. This special solvent coating design allows the ink to dry fast enabling use of the automatic take-up system provided with most solvent printers. This backlit film has greater ink density and color gamut than the leading translucent vinyl in a transmitted light application.

For best results use a pressure sensitive (cold) over-laminating film. When using a heat activated over-laminating encapsulate image to avoid split at the coating level.

<b>Caliper:</b>	6.8 mil
<b>Opacity:</b>	79%
<b>Brightness:</b>	121
<b>Whiteness:</b>	107 (We)
<b>Gloss:</b>	2 @ 60°

<i>Feature</i>	<i>Advantage</i>	<i>Benefit</i>
Fast dry coating	Dries off platen	Use take-up system to save time
Greater image density with low ink (1-hit) profile	Print faster, use less ink	Save time and money
Improved opacity	Better light diffusion	Best solution for a backlit application

**Optimal Storage Conditions:** Temperature 59° - 86° F - Humidity 30% - 70% RH

**Shelf Life:** One year stored at above conditions, unopened in original packaging
